## **II. Discussion.**

The application submitted by PSEG Power, LLC, and PSEG Nuclear, LLC (PSEG), for an ESP was submitted by letter dated May 25, 2010 (ADAMS Accession No. ML101480484), pursuant to Part 52 of Title 10 of the *Code of Federal Regulations*. A notice of receipt and availability of the application, which included the environmental report, was published in the *Federal Register* on June 18, 2010 (75 FR 34794). A notice of acceptance for docketing of the ESP application was published in the *Federal Register* on August 13, 2010 (75 FR 49539). A notice of intent to prepare a draft environmental impact statement (EIS) and to conduct the scoping process was published in the *Federal Register* on October 15, 2010 (75 FR 63521). On August 22, 2014, the NRC and USACE published for public comment the draft EIS in the *Federal Register* (79 FR 49820). The purpose of this solicitation was to obtain public comments on the draft EIS for NRC staff to consider in preparing the final EIS. The public comment period was to have ended on November 6, 2014. Extensions to the 75-day comment period may be provided at the discretion of the NRC staff if special circumstances are present. The NRC staff has determined that special circumstances exist that support extending this comment period. Those special circumstances include the recent identification of some individuals and organizations with special knowledge and expertise in the area of environmental justice that had not been aware of the original notice and other outreach efforts. In order to gain additional information on any minority or low-income populations that might be disproportionately affected, the NRC has determined that it is prudent, in this instance, to extend the public comment period on this document until December 6, 2014,

to allow more time for members of the public to submit their  
comments.

Dated at Rockville, Maryland, this 30<sup>th</sup> day of October, 2014.

For the Nuclear Regulatory Commission.

Frank Akstulewicz, Director,  
Division of New Reactor Licensing,  
Office of New Reactors.
